

CUSTOM TAPERED DRAIN SUMPS

Custom tapered drain sumps are a solution to greatly improving drainage on your flat roof. Standing water magnifies UV rays from the sun and causes premature deterioration.

Program Benefits:

- Proper drainage will deter birds and organic debris accumulation that can plug drains
- Drain sumps can be customized to draw water up to 30' away to the current drain locations
- Save major expense and disruption by not having to add plumbing on to the interior of the building
- Drain sumps are machine cut to 1% or 2% slope and provide the highest R-Value on the market
